

Shoes that do their job.

So that you can do yours.

Bakery / Food industry

Safety and hygiene are our daily bread

Even during modern manufacturing processes, employees are exposed to a wide range of impacts. In addition to heat, cold, mechanical risk of injury and long standing times, physical stress is also an important issue. The compliance with hygiene measures and appropriate protective measures are essential when working with food.

Suitable footwear not only protects the employee, but also the food and thus the consumer.

An absolute must for us:

- ✓ slip-resistant, cushioning outsoles for ultimate walking comfort
- ✓ easy-care, antibacterial, shape and weather resistant upper materials

bakery

- High wearing comfort
- Good foot climate
- Cushioning
- Replaceable insole
- SRC slip resistance
- HACCP
- Certified for orthopedic insoles

food industry

- HACCP
- High wearing comfort
- Good foot climate
- Optimal stability and grip
- Replaceable insole
- SRC slip resistance
- Certified for orthopedic insoles

Did you know?

A certified sole increase is possible with our x-light models without any problems.

Can a work shoe fit if you have to think about it all the time?

Certainly not. It should carry you enduringly, not make itself noticeable and simply ensure that you go through the workday safely and comfortably. Only when you put it on and take it off may you give the modern design a brief satisfied smile. That's exactly how it is with our shoes, and that's exactly why so many truly love their abebas.

Everything is about your wants, your needs. We take a bow with our shoes to the services your feet provide every day. **Since there are more important things to do in your workday than deal with stressed feet, we promise to carry you through your day with ease.**

Example shoe plan bakery / food industry

Department	Activity	Hazard/ Requirement	Recommended
production	dough making	standing for long periods, soiling on the shoe, danger of slipping	5012860
			5012861
production	baking processing	danger due to falling parts, danger of slipping, soiling	7131028
service	counter shop	high running performance, slip danger, damping	36776
			37310
warehouse/ logistics	driver/ warehouse staff	danger due to falling parts, slip danger, high running performance	5017863
			5010853
			5010852

x-light

Art. 713026 (white) 713029 (black)

- size 35-48
- microfibre
- steel toe-cap
- inner lining with silver ions
- replaceable Active Comfort insole (Art. 351620)
- instep area with elastic band
- anti-slip PU outsole

Food Trax

Art. 5012857

- size 35-51
- smooth leather, composite toe-cap
- metal free
- increased water resistance
- replaceable insole
- anti-slip PU outsole

Trax Light

Art. 5017863

- size 35-51
- textile, composite toe-cap
- metal free
- increased durability of the upper
- easy-clean upper
- anti-slip PU outsole

Craft

Art. 5010852 (boot) 5010853 (low shoe)

- size 38-48
- smooth leather, composite toe-cap
- metal free
- increased durability of the upper
- easy-clean upper
- cap protection
- achilles tendon protection
- anti-slip PU outsole

36774 36773 36775 36772

Uni6

Art. 36776

- size 35-48
- knitted textile
- protection against splash water
- inner lining with silver ions
- replaceable Active Comfort insole (Art. 352510)
- anti-slip TPU outsole

also available as safety shoes

Food Trax

Art. 5012861

- size 35-51
- smooth leather, composite toe-cap
- metal free penetration protection
- antibacterial insole
- increased water resistance
- anti-slip PU outsole

Food Trax

Art. 5012860

- size 35-51
- smooth leather, composite toe-cap
- metal free
- antibacterial insole
- increased water resistance
- anti-slip PU outsole

Food Trax

Art. 5012858

- size 35-51
- smooth leather, composite toe-cap
- antibacterial insole
- double velcro closure
- metal free penetration protection
- anti-slip PU outsole

procedure to orthopedic insoles

abeba specialist retailers

selection of the shoe model and size for the wearer

shoe wearer

visit to a specialized orthopedic store with selected shoe model

orthopedic specialist store and abeba

coordination of the insole blanks that can be used

orthopedic specialist company

manufacture of orthopedic insoles according to DGUV 112-191 after foot impression

employer of the insole wearer

settlement of total costs with orthopedic specialist company or pension insurance

Shoe care

When using the washing machine, you have to

- use a hand wash program to avoid straining the shoes too much.
- remove insoles before washing
- in the case of coloured shoes, remove the laces if they are white to avoid discolouration
- Use a soft detergent. A wool detergent can be used for textile shoes.
- Do not use fabric softener. This can make the upper materials porous and generate unpleasant odours in the shoes.
- Wash shoes, if possible, in a laundry net to provide additional protection from the washing drum.

For drying, we recommend

Use newspaper to stuff the wet shoes to reduce the drying time.

For drying DO NOT:

1. Use tumble drying, it can seriously damage the shoe.
2. dry in the sun, there is a risk of discoloration, especially with white shoes and outsoles.
3. dry on or under a radiator, high temperatures would damage the shoes.

Icons

washable at 30°C

replaceable insole

suitable for kitchens

cushioning effect

ESD

with steel toe-cap

with composite toe-cap

heel and foot lift

orthopedic insoles

HACCP-compliant

metal free penetration protection
